Lucknow, Uttar Pradesh

OBJECTIVE

Backend-focused full-stack engineer and a CS student at VIT Bhopal with hands-on production experience building distributed, event-driven systems. Architected end-to-end platforms processing real-time data pipelines with sub-200ms latency and containerized microservice deployments.

EDUCATION

VIT Bhopal University

Computer Science Engineering GPA: 8.42 / 10.00

Sep 2023 – May 2027

Bhopal, India

Saiyyid Hamid Sr. Sec. School, AMU

Intermediate (XII) Grade: 92.0%

June 2022

Aligarh, India

SKILLS

- **Languages:** JavaScript, TypeScript, Java, SQL, C++
- **Backend & Frameworks:** Node.js, Express.js, Next.js, React Native, RESTful APIs, WebSockets, RabbitMQ
- **Databases:** PostgreSQL (Supabase), MySQL, MongoDB, Redis (Upstash), Elasticsearch (familiar), Firebase
- **DevOps, Architecture & Tools:** Docker, Docker Compose, CI/CD (Jenkins/GitHub Actions), AWS (EC2, S3, ECS), Microservices, Event-Driven Design, Message Queuing, Git, Postman

PROJECTS

- **GuardianSense: Real-time Distributed Monitoring System** July 2025
Node.js, Next.js 15, TypeScript, PostgreSQL (Supabase), Redis (Upstash), Docker, Firebase, EAS 
 - Achieved **sub-200ms location-data latency** (down from ~3s) by architecting a **PostgreSQL CDC** real-time event pipeline via Supabase Replication, eliminating polling bottlenecks for high-frequency telemetry.
 - Engineered a **secure multi-device pairing flow** using **Redis** rate-limiting and a custom token-exchange protocol — converts short-lived OTP codes to persistent JWTs, blocking brute-force attempts with configurable throttling.
 - Built a **real-time geofencing engine** classifying GPS coordinates into 3 safety tiers and triggering **Telegram Bot API** alerts within 500ms of breach, across a Zod-validated TypeScript monorepo shared by Next.js and Expo.
 - Orchestrated a **Dockerized deployment** with Vercel edge functions and EAS native builds, managing secrets across 2 production profiles with zero-downtime releases.
- **Attentia.ai: Real-time Biometric Orchestration Engine** April 2026
Python, Flask-Sock (WebSockets), OpenCV, MediaPipe, Next.js 15, PostgreSQL, Docker, Docker Compose 
 - Built an **event-driven Python backend** using **Flask-Sock** to ingest concurrent biometric streams from camera and microphone sensors, coordinating multi-service intervention policies via an async session loop.
 - Replaced REST polling (800ms+ lag) with a **custom full-duplex WebSocket protocol**, achieving real-time state sync between the Python intelligence layer and a Next.js dashboard.
 - Achieved **99%+ uptime** under hardware failure via a decoupled service architecture — graceful module failover maintains application state and data integrity on partial sensor input.
 - Containerized the **4-service platform** with **Docker Compose** (custom networking, volume management), enabling single-command deployment and cutting environment-specific failures to zero.

HACKATHONS & RECOGNITIONS

- **Runner-Up — MERNxAI Hackathon (ModelMart.ai)** April 2025
MERN Stack Club, VIT Bhopal
 - Placed **2nd out of 40+ teams** in a 48-hour hackathon; built an AI model marketplace with a **Node.js/Express backend**, **Postgres** for model metadata, and React frontend — judged on technical depth and product viability.

LEADERSHIP EXPERIENCE

- **General Secretary** June 2025 – December 2025
The Startup Club, VIT Bhopal University 
 - Connected student founders with industry professionals via curated networking; initialized a platform for students to find collaborators and build on startup ideas together.
- **Tech & Product Team Lead** July 2024 – June 2025
The Software Development Club, VIT Bhopal University 
 - Led development of the **club's official website**, building an event registration system that handled **5,000+ student registrations** and internal club member management — with zero reported downtime.

CERTIFICATIONS

- **The AI Engineer Course: AI Engineer Bootcamp** — Udemy July 2025
- **The React Complete Guide 2025** — Udemy March 2025
- **The Complete Full Stack Web Development Bootcamp** — Udemy January 2025
